

Assignment 1 (HF, major subject)

Due: Wed 31.10.2018; 18:00h (1 Week)

Goals

After doing these exercises, you know how to use **Vanilla JS** to...

- Access and modify the DOM
- Handle events

Do not use any library / framework for this assignment. [#UseThePlatform](#)

Task 1: Picture Slide Show

Difficulty: Easy

Figure 1 - Image Source: <https://app-layout-assets.appspot.com/assets/bg1.jpg>

Create a webpage from scratch. It should have a slide show / image carousel. The user can click two buttons (left/right) to browse through the available images one at a time. If the final slide is reached, you can either prevent going further, or start from the beginning (cycle). The number of the current slide should be displayed somewhere on the page (it doesn't have to be on top of the images). Watch a demo here: https://youtu.be/dr_JKOyXdFA

Include all code files in your submission in a folder "task01".

Submission

Please turn in your solution as ZIP file via UniWorX. You can form groups of up to three people.

We encourage you to sign up for Slack! All you need is a CIP account and an email address that ends in “@cip.ifi.lmu.de”. Ask us if you don’t know how to get them.

If you have questions or comments before the submission, please contact one of the tutors. They are on Slack [@nadjaterz](#), [@thomas-weber](#), [@Florian Bemann](#), [@zhenhaoli](#) and [@georghagemann](#). Remember, that they also want to enjoy their weekends ☺

It also makes sense to ask the question in our #mmn-ws1819 channel. Maybe fellow students can help or benefit from the answers, too!
